 4 Door Sedan

First Responder
 Rescue Sheet

The Cadillac CT6 PHEV technology incorporates a low voltage battery that must be disconnected prior to occupant extrication.

To Disable the Vehicle:

1. Turn the ignition to "OFF" and remove the keys from the vehicle.
2. Double cut all low voltage cables marked by the yellow tape located on the right side of the rear compartment.

Do **NOT** cut any orange colored high voltage cables.

EMERGENCY PERSONNEL:
 To help avoid personal injury in an emergency,
 • Turn ignition to "Off".
 • Cut all cables connected at yellow tape. (See diagram)

PERSONNEL AFFECTÉ AUX URGENCES :
 Afin d'éviter toute lésion personnelle, effectuer ce qui suit en cas d'urgence :
 • Mettre la clé de contact sur « Off » (arrêt).
 • Couper tous les câbles branchés au ruban jaune (voir le schéma).

应急人员：
 为避免人身伤害，在出现紧急情况时，
 • 将点火置于“关”的位置。
 • 切断所有连接在黄胶带处的电缆（见图表）。

SERVICE PERSONNEL:
 To help avoid personal injury during vehicle service, disconnect both battery locations (see diagram).

PERSONNEL AFFECTÉ À L'ENTRETIEN :
 Afin d'éviter toute lésion personnelle pendant l'entretien du véhicule, déconnecter es deux emplacements de la batterie (voir le schéma).

维修人员：
 为避免在维修车辆时导致人身伤害，
 断开两个电池连接位置的连接断开两个
 电池连接位置的连接（见图表）。

Air Bag Caution

After disabling 12 volt power, wait at least 10 seconds to allow any un-deployed airbag reserve energy to dissipate.

In Case of Fire

A battery on fire will not explode. If battery cells reach high enough temperature, they vent and release electrolyte. Battery electrolyte is flammable. Use copious amounts of water to cool the battery to extinguish the fire. Do not use an ABC dry chemical extinguisher because it will not extinguish a battery fire.

In Case of Water Immersion

The high voltage battery is isolated from the vehicle chassis. If the vehicle is immersed in water, you will not be electrocuted by touching the vehicle.
